

Good Distribution Practices (GDP) for the pharmaceutical and allied sectors

Seminar at the Runnymede Hotel, Egham
in Surrey – July 11th, 2006

 Highly interactive course, aimed at all pharmaceutical professionals wishing to increase their knowledge and understanding of GDP requirements.

Aims to evaluate GDP (Directive 2001/83/EU, Directive 2004/27/EC, EU Guidelines on Good Distribution of Medicinal Products for Human Use 94/C63/03) and explore these from the viewpoint of both industry and the authorities.

 Offers a practical explanation for those engaged in setting up and implementing GDP or managing quality systems for pharmaceutical products.

Topics Include:

- What is GDP and why is it needed?
- GDP per EU directives/regulations & guidelines
- The Orange Guide
- MHRA - hot topics in GDP
- MHRA - guidelines/expectations & perspective on GDP
- Counterfeit products
- Mock recall

Objectives:

-  Understand the regulatory requirements and constraints facing wholesalers and distributors of pharmaceutical products
-  Become familiar with the relevant sections and clauses of the 'Orange Guide'
-  Develop their organisation's process and identify the controls necessary to ensure compliance with GDP regulations

Course format:

The course consists of formal content presentation interspersed with content quiz sessions and intensive audience participation. It may be modified to run in-house for client companies.

Target sectors:

- Any company with, or considering, an MHRA Wholesale Dealer's Licence
- Pharmaceutical manufacturers
- Pharmaceutical suppliers and contractors
- Wholesalers & distributors
- Active ingredient and excipient manufacturers
- Logistics companies
- Contract laboratories

Target audience:

- Warehouse staff
- Purchasing & logistics staff
- Customer service staff
- Sales staff
- Quality control and quality assurance staff at all levels
- Regulatory and compliance staff

Course tutors:

Ciaran Brady has 25 years' experience in supply chain/materials management in the pharmaceutical, healthcare and drinks industry. He is currently managing partner of PLS Pharma Logistics, engaged in the provision of tailor-made purchasing, logistics and supply chain management solutions. Services include consulting, coaching, education, training and responsible person services. He has worked for major multinational pharmaceutical companies at a senior level, mainly in supply chain/materials management.

Aidan Madden is general manager of FivePharma.com, a company offering tailored training courses to the pharmaceutical and allied sectors. The company can also provide qualified person services, assist in quality systems development and offers contract auditing services. Aidan has many years' experience working for multinational pharma and biologics companies in various quality roles.
